SUBJECT INDEX TO VOLUME 33 (1992)

Nervous system (incl. skull)

Rhabdomyosarcoma of the petrous ridge. CT and MR imaging in an atypical case with multiple cranial nerve palsy 76
Carotid-cavernous fistula treated with detachable balloon during bilateral transcranial Doppler monitoring of middle cerebral arteries. A case report 145
MR imaging of chronic alcoholism 201
MR imaging of intradural extramedullary tumors . . 207
Gd-DTPA-enhanced MR imaging of pituitary macroadenomas 323
CT showing early ventricular dilatation after subarachnoidal hemorrhage 333
MR imaging of spinal lymphoma 338
MR imaging of pituitary macroadenomas before and after transsphenoidal surgery 396
Measurements of T1 and T2 over time in formalin-fixed human whole-brain specimens 400
Gadodiamide injection and Gadopentetate dimeglumine. A double-blind study in MR imaging of the CNS 405
Comparison of 12-bit and 8-bit gray scale resolution in MR imaging of the CNS. An ROC analysis . . . 505
Ultrasound guided needle biopsy of brain tumors using an automatic sampling instrument 512

Ear, nose, throat and eye

Rhabdomyosarcoma of the petrous ridge. CT and MR imaging in an atypical case with multiple cranial nerve palsy 76
Influence of CT on tumor classification of laryngeal carcinomas 314
CT appearances of normal and obstructed submandibular duct 414
Diagnosis of aneurysm of superior thyroid artery by CT and MR imaging 420
CT and MR imaging of primary tumors of the masticator space 518
Comparison of CT findings in non-Hodgkin's disease and squamous cell carcinoma of the maxillary sinus 523

Bones, joints and soft tissues

Diagnostic imaging in fracture of lumbar vertebral ring apophyses 72
Ultra low field MR imaging of cervical spine involvement in rheumatoid arthritis 89
Spinal gas collection demonstrated at CT 93
Colloid scintigraphy showing red bone marrow extension in patients with prostatic carcinoma 97
Phantom studies of triple photon absorptiometry and bone mineral measurement at a hip prosthesis . . . 103
Quantitative radio-isotope scanning of the sacroiliac joints in ankylosing spondylitis 169
MR imaging with histopathological correlation in vertebral metastases of breast cancer 213
Contrast medium injected into juvenile bone cysts to analyze interior morphology and guide intracavity corticosteroid treatment 221
Combined CT-guided biopsy and cytology in diagnosis of bony lesions 225
Precision of hyaline cartilage thickness measurements 234
Concomitant changes in MR image and morphology induced by glucose and fructose in B16 mouse melanomas 266
Lack of correlation between ulnar variance and carpal bone angles on lateral radiographs in normal wrists 275
MR imaging of spinal lymphoma 338
Temporomandibular joint movement. Evaluation of protrusive splint therapy with GRASS MR imaging 410
Bone marrow extension and pelvic bone marrow activity in alcoholic liver disease. A RES scintigraphic investigation 464
Necrosis observed on CT enhancement is of prognostic value in soft tissue sarcoma 474
Comparison of dual energy X-ray absorptiometry of the proximal femur with morphologic data 477
CT of the wrist in suspected scaphoid fracture 500
CT diagnosis of macrodystrophia lipomatosa. A case report 554

Breast

Relation between lightscanning and the histologic and mammographic appearance of malignant breast tumors 63
Diagnostic accuracy of lightscanning and mammography in women with dense breasts 69
Radiography of the male breast in gynecomastia . . . 110
Muscular hamartoma of the breast. A case report . . 115
MR imaging with histopathological correlation in vertebral metastases of breast cancer 213
Time-resolved transillumination of the breast 277
Leiomyosarcoma in Poland's syndrome. A case report 444

Cardiovascular system

Epicardial fat causing pitfalls in CT and MR imaging of the pericardium 1
Computer-aided interpretation of coronary cineangiograms. Accuracy of automatic detection of stenotic lesions 6
Decreased perfusion in myocardial region of normal donor artery secondary to collateral development. Stress ^{201}Tl myocardial emission CT performed in patients with single vessel exertional angina having

Comparison of dual energy X-ray absorptiometry of the proximal femur with morphologic data 477
CT of the wrist in suspected scaphoid fracture 500
CT diagnosis of macrodystrophia lipomatosa. A case report 554

Breast

Relation between lightscanning and the histologic and mammographic appearance of malignant breast tumors 63
Diagnostic accuracy of lightscanning and mammography in women with dense breasts 69
Radiography of the male breast in gynecomastia . . . 110
Muscular hamartoma of the breast. A case report . . 115
MR imaging with histopathological correlation in vertebral metastases of breast cancer 213
Time-resolved transillumination of the breast 277
Leiomyosarcoma in Poland's syndrome. A case report 444

Cardiovascular system

Epicardial fat causing pitfalls in CT and MR imaging of the pericardium 1
Computer-aided interpretation of coronary cineangiograms. Accuracy of automatic detection of stenotic lesions 6
Decreased perfusion in myocardial region of normal donor artery secondary to collateral development. Stress ^{201}Tl myocardial emission CT performed in patients with single vessel exertional angina having

collaterals 10
"Chess-board pattern" spatial modulation of magnetization. Assessment of myocardial function 16
Phlebography as the gold standard in thromboprophylactic studies? A multicenter interobserver variation study 24
Patency after iliac and femoro-popliteal angioplasty. Difference between angiographic and clinical results 29
Emergent embolization for control of massive hemorrhage from a splanchnic artery with a new coaxial catheter system 57
Restenosis after percutaneous transluminal coronary angioplasty 149
Percutaneous transluminal angioplasty of crural arteries 152
Application of expandable metallic stents to the venous system 156
MR imaging, flow and motion. Review Article 179
Combined angioplasty with the Kensey catheter and balloon angioplasty in occlusive arterial disease. A preliminary report 230
Liver trauma and transection of the inferior vena cava. Sentinel contrast sign and hepatic perivenous tracking 255
Ductus arteriosus aneurysm imaging using modern diagnostic methods. Review Article 285
Iliac artery stenting - clinical experience with the Palmaz stent, Wallstent, and Strecker stent 292
Clinical utility of real-time compression ultrasonography for diagnostic management of patients with recurrent venous thrombosis 297
MR imaging of acute myocardial infarction in pigs using Gd-DTPA-labeled dextran 301
Complications of percutaneous pericardiocentesis under fluoroscopic guidance 309
Experimental transjugular portacaval shunt. Use of a fine-needle puncture device for the implantation of Strecker stents 356
Diagnosis of aneurysm of superior thyroid artery by CT and MR imaging 420
Aberrant left gastric vein directly draining into left portal venous system. A case report 462
Addition of sodium to the nonionic contrast medium iohexol during coronary angiography in man. Lack of electrocardiographic or hemodynamic effects . . 485
Large vein sampling for intact parathyroid hormone in preoperative localization of enlarged parathyroid glands 528
Intravascular ultrasonographic appearance of angiographically normal arteries related to age and the occurrence of vascular disease 532
Holmium:YAG laser angioplasty. Experimental ablation of vascular tissue via flexible ring catheters . . 538
Visual interpretation compared with caliper and computerized measurements in experimental vessel stenosis 542
Iodixanol – a new nonionic dimer – in aortofemoral angiography 611

Mediastinum and respiratory system

Epicardial fat causing pitfalls in CT and MR imaging of the pericardium 1
Interobserver variability in the radiographic diagnosis of adult outpatient pneumonia 79
Comparison between radiographs displayed on monitor and hard-copy 117
Single exposure dual-energy subtraction radiography of the upper airways using computed radiography 281
Complications of percutaneous pericardiocentesis under fluoroscopic guidance 309
Ultrasound guided tumour biopsy in the anterior mediastinum. An alternative to thoracotomy and mediastinoscopy 423
Bedside chest radiography using digital luminescence. A comparison between digital radiographs reviewed on a personal computer and as hard-copies 427
Diagnosis of tracheal carcinoma at chest radiography 546
High resolution CT in children with cystic fibrosis . . 548

Digestive tract

Emergent embolization for control of massive hemorrhage from a splanchnic artery with a new coaxial catheter system 57
A prospective comparison of ^{99m}Tc-labeled polyclonal human immunoglobulin and ^{111}In granulocytes for localization of inflammatory bowel disease 140
Balloon dilatation of esophageal strictures in children with a simplified technique 172
Air enema revisited in assessment of colitis 360
Nonresectable adenocarcinoma of the rectum assessed by MR imaging before and after chemotherapy and irradiation 447
Anal sphincter size measured by endosonography in healthy volunteers. Effect of age, sex, and parity . . 453
Thrombosed hemorrhoid mimicking rectal carcinoma at CT 457

Liver, biliary tract

Ultrasonography, CT, and ERCP in the diagnosis of choledochal stones 53
Emergent embolization for control of massive hemorrhage from a splanchnic artery with a new coaxial catheter system 57
Extracorporeal shockwave lithotripsy for a giant calcified gallbladder stone. Case report 128
Radiologic approach to bile duct cysts in adults 240
Regenerative nodules in hepatic cirrhosis. Value of gradient-echo MR imaging with a surface coil 245
CT and angiography in chronic liver disease 251
Liver trauma and transection of the inferior vena cava. Sentinel contrast sign and hepatic perivenous

tracking 255
In vivo ^{19}F MR spectroscopic study of metabolism of 5-fluorotryptophan in rat liver 258
Abdominal ultrasonography in myelofibrosis 343
Assessment of liver iron overload in thalassemic patients by MR imaging 347
Hilar cholangiocarcinoma. An evaluation of subtypes with CT and angiography 351
Aberrant left gastric vein directly draining into left portal venous system. A case report 462
Bone marrow extension and pelvic bone marrow activity in alcoholic liver disease. A RES scintigraphic investigation 464
P-31 MR spectrum and histologic changes after intrahepatic arterial injection of iodized oil in normal and cirrhotic rat liver 468
CT attenuation of normal liver parenchyma on delayed scanning with iohexol 502

Spleen, pancreas

CT in pancreatic involvement on non-Hodgkin lymphoma 123
Ultrasound-guided aspiration cytology of the spleen 137
Abdominal ultrasonography in myelofibrosis 343
Hydatid disease of the spleen. Ultrasonography, CT and MR imaging 459
CT compared to angiography for staging of tumors of the pancreatic head 556
Splenic abscess. Imaging and intervention 561

Abdomen

CT-guided percutaneous drainage and fluid aspiration in intensive care patients 131
Air enema revisited in assessment of colitis 360
Leiomyosarcoma in Poland's syndrome. A case report 444

Urogenital system

CT of carcinoma of the renal pelvis 31
CT analysis of metastatic neoplasms of the kidney. Comparison with primary renal cell carcinoma . . . 39
Lithotripsy of urinary bladder stones with a mechanical lithotriptor inserted through a narrow introducer. An experimental study in pigs 50
Colloid scintigraphy showing red bone marrow extension in patients with prostatic carcinoma 97
Ultrasound guided nephrostomy utilizing a one-step balloon catheter. Introduction of a new technique 279
CT demonstration of fat density in renal cell carcinoma 365
MR imaging of acute renal cortical necrosis. A case report 431
Polyetiology of renal allograft dysfunction. Does calculation of the resistive index still make sense? 434
Calcified bladder tumors. CT features 440
Leiomyosarcoma in Poland's syndrome. A case report 444
Pharmacokinetics of iopentol in patients with chronic renal failure 482
CT evaluation of compensatory renal growth in relation to postnephrectomy time 566
Plain radiography, renography, and ^{99m}Tc-DMSA renal scintigraphy before and after extracorporeal shock wave lithotripsy for urolithiasis 569
Acute renal failure secondary to rhabdomyolysis. MR imaging of the kidney 573
MR imaging with STIR technique and air insufflation for local staging of bladder neoplasms 577
MR pelvimetry – a practical alternative 582
Influence of contrast media on single nephron glomerular filtration rate in rat kidney. A comparison between diatrizoate, iohexol, ioxaglate, and iotrolan 596

Endocrine system

CT and angiography in adrenocortical carcinoma . . 45
Differential diagnosis of adrenal masses using out-of-phase FLASH imaging. A preliminary report 262
Thallium-technetium subtraction scintigraphy of enlarged parathyroid glands after calcitonin stimulation of parathyroid hormone secretion 319
Gd-DTPA-enhanced MR imaging of pituitary macroadenomas 323
MR imaging of pituitary macroadenomas before and after transsphenoidal surgery 396
Large vein sampling for intact parathyroid hormone in preoperative localization of enlarged parathyroid glands 528

Lymphatic system

CT in pancreatic involvement on non-Hodgkin lymphoma 123
Comparison of CT findings in non-Hodgkin's disease and squamous cell carcinoma of the maxillary sinus 523

Pediatric radiology

Balloon dilatation of esophageal strictures in children with a simplified technique 172
Contrast medium injected into juvenile bone cysts to analyze interior morphology and guide intracavity corticosteroid treatment 221
High resolution CT in children with cystic fibrosis . . 548
Comparison of intravenous contrast agents for CT studies in children 592

Digital radiography

Comparison between radiographs displayed on monitor and hard-copy 117
Single exposure dual-energy subtraction radiography of the upper airways using computed radiography 281
Bedside chest radiography using digital luminescence. A comparison between digital radiographs reviewed on a personal computer and as hard-copies 427

Ultrasonography

Ultrasonography, CT, and ERCP in the diagnosis of choledochal stones 53
Radiography of the male breast in gynecomastia . . . 110
CT-guided percutaneous drainage and fluid aspiration in intensive care patients 131
Ultrasound-guided aspiration cytology of the spleen 137
Carotid-cavernous fistula treated with detachable balloon during bilateral transcranial Doppler monitoring of middle cerebral arteries. A case report 145
Air-contrast ultrasonography. A new method for assessment of percutaneous injection technique 173
Precision of hyaline cartilage thickness measurements 234
Ultrasound guided nephrostomy utilizing a one-step balloon catheter. Introduction of a new technique 279
Ductus arteriosus aneurysm imaging using modern diagnostic methods. Review Article 285
Clinical utility of real-time compression ultrasonography for diagnostic management of patients with recurrent venous thrombosis 297
Abdominal ultrasonography in myelofibrosis 343
Polyetiology of renal allograft dysfunction. Does calculation of the resistive index still make sense? 434
Anal sphincter size measured by endosonography in healthy volunteers. Effect of age, sex, and parity . . 453
Hydatid disease of the spleen. Ultrasonography, CT and MR imaging 459
Ultrasound guided needle biopsy of brain tumors using an automatic sampling instrument 512
Intravascular ultrasonographic appearance of angiographically normal arteries related to age and the occurrence of vascular disease 532
Splenic abscess. Imaging and intervention 561

Computed tomography (CT)

Epicardial fat causing pitfalls in CT and MR imaging of the pericardium 1
CT of carcinoma of the renal pelvis 31
CT analysis of metastatic neoplasms of the kidney. Comparison with primary renal cell carcinoma . . . 39
CT and angiography in adrenocortical carcinoma . . 45
Ultrasonography, CT, and ERCP in the diagnosis of choledochal stones 53
Diagnostic imaging in fracture of lumbar vertebral ring apophyses 72
Rhabdomyosarcoma of the petrous ridge. CT and MR imaging in an atypical case with multiple cranial nerve palsy 76
Spinal gas collection demonstrated at CT 93
CT in pancreatic involvement on non-Hodgkin lymphoma 123
CT-guided percutaneous drainage and fluid aspiration in intensive care patients 131
Combined CT-guided biopsy and cytology in diagnosis of bony lesions 225
CT and angiography in chronic liver disease 251
Liver trauma and transection of the inferior vena cava. Sentinel contrast sign and hepatic perivenous tracking 255
Ductus arteriosus aneurysm imaging using modern diagnostic methods. Review Article 285
Influence of CT on tumor classification of laryngeal carcinomas 314
CT showing early ventricular dilatation after subarachnoidal hemorrhage 333
Hilar cholangiocarcinoma. An evaluation of subtypes with CT and angiography 351
CT demonstration of fat density in renal cell carcinoma 365
CT appearances of normal and obstructed submandibular duct 414
Diagnosis of aneurysm of superior thyroid artery by CT and MR imaging 420
Calcified bladder tumors. CT features 440
Thrombosed hemorrhoid mimicking rectal carcinoma at CT 457
Hydatid disease of the spleen. Ultrasonography, CT and MR imaging 459
Necrosis observed on CT enhancement is of prognostic value in soft tissue sarcoma 474
CT of the wrist in suspected scaphoid fracture 500
CT attenuation of normal liver parenchyma on delayed scanning with iohexol 502
CT and MR imaging of primary tumors of the masticator space 518
Comparison of CT findings in non-Hodgkin's disease and squamous cell carcinoma of the maxillary sinus 523
High resolution CT in children with cystic fibrosis . . 548
CT diagnosis of macrodystrophia lipomatosa. A case report 554
CT compared to angiography for staging of tumors of the pancreatic head 556
Splenic abscess. Imaging and intervention 561
CT evaluation of compensatory renal growth in relation to postnephrectomy time 566
One or two samples for determination of total plasma clearance of a nonionic contrast medium in patients undergoing enhanced CT 588
Comparison of intravenous contrast agents for CT studies in children 592

MR imaging and spectroscopy

Epicardial fat causing pitfalls in CT and MR imaging of the pericardium 1
"Chess-board pattern" spatial modulation of magnetization. Assessment of myocardial function 16
Diagnostic imaging in fracture of lumbar vertebral ring apophyses 72
Rhabdomyosarcoma of the petrous ridge. CT and MR imaging in an atypical case with multiple cranial

nerve palsy 76
Ultra low field MR imaging of cervical spine involvement in rheumatoid arthritis 89
MR imaging, flow and motion. Review Article 179
MR imaging of chronic alcoholism 201
MR imaging of intradural extramedullary tumors . . 207
MR imaging with histopathological correlation in vertebral metastases of breast cancer 213
Precision of hyaline cartilage thickness measurements 234
Regenerative nodules in hepatic cirrhosis. Value of gradient-echo MR imaging with a surface coil 245
In vivo ^{19}F MR spectroscopic study of metabolism of 5-fluorotryptophan in rat liver 258
Differential diagnosis of adrenal masses using out-of-phase FLASH imaging. A preliminary report 262
Concomitant changes in MR image and morphology induced by glucose and fructose in B16 mouse melanomas 266
MR imaging of acute myocardial infarction in pigs using Gd-DTPA-labeled dextran 301
Gd-DTPA-enhanced MR imaging of pituitary macroadenomas 323
MR imaging of spinal lymphoma 338
Assessment of liver iron overload in thalassemic patients by MR imaging 347
MR imaging of pituitary macroadenomas before and after transsphenoidal surgery 396
Measurements of T1 and T2 over time in formalin-fixed human whole-brain specimens 400
Gadodiamide injection and Gadopentetate dimeglumine. A double-blind study in MR imaging of the CNS 405
Temporomandibular joint movement. Evaluation of protrusive splint therapy with GRASS MR imaging 410
Diagnosis of aneurysm of superior thyroid artery by CT and MR imaging 420
MR imaging of acute renal cortical necrosis. A case report 431
Nonresectable adenocarcinoma of the rectum assessed by MR imaging before and after chemotherapy and irradiation 447
Hydatid disease of the spleen. Ultrasonography, CT and MR imaging 459
P-31 MR spectrum and histologic changes after intrahepatic arterial injection of iodized oil in normal and cirrhotic rat liver 468
Comparison of 12-bit and 8-bit gray scale resolution in MR imaging of the CNS. An ROC analysis . . . 505
CT and MR imaging of primary tumors of the masticator space 518
Acute renal failure secondary to rhabdomyolysis. MR imaging of the kidney 573
MR imaging with STIR technique and air insufflation for local staging of bladder neoplasms 577
MR pelvimetry – a practical alternative 582
Motion associated susceptibility artifacts 606

Nuclear radiology

Decreased perfusion in myocardial region of normal donor artery secondary to collateral development. Stress ^{201}T1 myocardial emission CT performed in patients with single vessel exertional angina having collaterals 10
Colloid scintigraphy showing red bone marrow extension in patients with prostatic carcinoma 97
Phantom studies of triple photon absorptiometry and bone mineral measurement at a hip prosthesis . . . 103
A prospective comparison of ^{99m}Tc-labeled polyclonal human immunoglobulin and ^{111}In granulocytes for localization of inflammatory bowel disease 140
Quantitative radio-isotope scanning of the sacroiliac joints in ankylosing spondylitis 169
Thallium-technetium subtraction scintigraphy of enlarged parathyroid glands after calcitonin stimulation of parathyroid hormone secretion 319
Bone marrow extension and pelvic bone marrow activity in alcoholic liver disease. A RES scintigraphic investigation 464
Large vein sampling for intact parathyroid hormone in preoperative localization of enlarged parathyroid glands 528
Splenic abscess. Imaging and intervention 561
Plain radiography, renography, and ^{99m}Tc-DMSA renal scintigraphy before and after extracorporeal shock wave lithotripsy for urolithiasis 569

Interventional radiology

Patency after iliac and femoro-popliteal angioplasty. Difference between angiographic and clinical results 29
Lithotripsy of urinary bladder stones with a mechanical lithotriptor inserted through a narrow introducer. An experimental study in pigs 50
Emergent embolization for control of massive hemorrhage from a splanchnic artery with a new coaxial catheter system 57
Extracorporeal shockwave lithotripsy for a giant calcified gallbladder stone. Case report 128
CT-guided percutaneous drainage and fluid aspiration in intensive care patients 131
Ultrasound-guided aspiration cytology of the spleen 137
Carotid-cavernous fistula treated with detachable balloon during bilateral transcranial Doppler monitoring of middle cerebral arteries. A case report 145
Restenosis after percutaneous transluminal coronary angioplasty 149
Percutaneous transluminal angioplasty of crural arteries 152
Application of expandable metallic stents to the venous system 156
Balloon dilatation of esophageal strictures in children with a simplified technique 172
Contrast medium injected into juvenile bone cysts to analyze interior morphology and guide intracavity

corticosteroid treatment 221
Combined CT-guided biopsy and cytology in diagnosis of bony lesions 225
Combined angioplasty with the Kensey catheter and balloon angioplasty in occlusive arterial disease. A preliminary report 230
Radiologic approach to bile duct cysts in adults 240
Ultrasound guided nephrostomy utilizing a one-step balloon catheter. Introduction of a new technique 279
Iliac artery stenting - clinical experience with the Palmaz stent, Wallstent, and Strecker stent 292
Complications of percutaneous pericardiocentesis under fluoroscopic guidance 309
Experimental transjugular portacaval shunt. Use of a fine-needle puncture device for the implantation of Strecker stents 356
Ultrasound guided tumour biopsy in the anterior mediastinum. An alternative to thoracotomy and mediastinoscopy 423
P-31 MR spectrum and histologic changes after intrahepatic arterial injection of iodized oil in normal and cirrhotic rat liver 468
Ultrasound guided needle biopsy of brain tumors using an automatic sampling instrument 512
Holmium:YAG laser angioplasty. Experimental ablation of vascular tissue via flexible ring catheters . . 538
Splenic abscess. Imaging and intervention 561

Experimental radiology

Lithotripsy of urinary bladder stones with a mechanical lithotriptor inserted through a narrow introducer. An experimental study in pigs 50
Phantom studies of triple photon absorptiometry and bone mineral measurement at a hip prosthesis . . . 103
Comparison between radiographs displayed on monitor and hard-copy 117
Granulocyte chemotaxis before and after urography. Influence of four different radiographic contrast media 164
In vivo ^{19}F MR spectroscopic study of metabolism of 5-fluorotryptophan in rat liver 258
Concomitant changes in MR image and morphology induced by glucose and fructose in B16 mouse melanomas 266
Phagocytic properties of granulocytes after intravenous injection of ioxaglate or iohexol 271
MR imaging of acute myocardial infarction in pigs using Gd-DTPA-labeled dextran 301
Experimental transjugular portacaval shunt. Use of a fine-needle puncture device for the implantation of Strecker stents 356
Granulocyte adherence is inhibited by radiographic contrast media in vitro 379
P-31 MR spectrum and histologic changes after intrahepatic arterial injection of iodized oil in normal and cirrhotic rat liver 468
Granulocyte adherence after intravenous and intraarterial injection of ioxaglate or iohexol 490
Radiographic contrast media and release of neutrophil specific proteins in vitro and after intravenous injection 495
Holmium:YAG laser angioplasty. Experimental ablation of vascular tissue via flexible ring catheters . . 538
Visual interpretation compared with caliper and computerized measurements in experimental vessel stenosis 542
Influence of contrast media on single nephron glomerular filtration rate in rat kidney. A comparison between diatrizoate, iohexol, ioxaglate, and iotrolan 596
Motion associated susceptibility artifacts 606

Contrast media and other drugs

Leukotriene B_4 and peptido-leukotriene levels during radiographic contrast media infusion 160
Granulocyte chemotaxis before and after urography. Influence of four different radiographic contrast media 164
In vivo ^{19}F MR spectroscopic study of metabolism of 5-fluorotryptophan in rat liver 258
Concomitant changes in MR image and morphology induced by glucose and fructose in B16 mouse melanomas 266
Phagocytic properties of granulocytes after intravenous injection of ioxaglate or iohexol 271
MR imaging of acute myocardial infarction in pigs using Gd-DTPA-labeled dextran 301
Iopentol in urography. A clinical comparison between iopentol and metrizoate including delayed reactions 368
Level of plasma prekallikrein and its inhibitors in reactors and nonreactors during intravenous enhancement with contrast media 374
Granulocyte adherence is inhibited by radiographic contrast media in vitro 379
Gadodiamide injection and Gadopentetate dimeglumine. A double-blind study in MR imaging of the CNS 405
Pharmacokinetics of iopentol in patients with chronic renal failure 482
Addition of sodium to the nonionic contrast medium iohexol during coronary angiography in man. Lack of electrocardiographic or hemodynamic effects . . 485
Granulocyte adherence after intravenous and intraarterial injection of ioxaglate or iohexol 490
Radiographic contrast media and release of neutrophil specific proteins in vitro and after intravenous injection 495
CT attenuation of normal liver parenchyma on delayed scanning with iohexol 502
One or two samples for determination of total plasma clearance of a nonionic contrast medium in patients undergoing enhanced CT 588
Comparison of intravenous contrast agents for CT

studies in children 592
Influence of contrast media on single nephron glomerular filtration rate in rat kidney. A comparison between diatrizoate, iohexol, ioxaglate, and iotrolan 596
Viscosity of some contemporary contrast media before and after mixing with whole blood 600
Motion associated susceptibility artifacts 606
Iodixanol – a new nonionic dimer – in aortofemoral angiography 611

Physics and technique

"Chess-board pattern" spatial modulation of magnetization. Assessment of myocardial function 16
Balloon dilatation of esophageal strictures in children with a simplified technique 172
Air-contrast ultrasonography. A new method for assessment of percutaneous injection technique 173
Regenerative nodules in hepatic cirrhosis. Value of gradient-echo MR imaging with a surface coil 245
Differential diagnosis of adrenal masses using out-of-phase FLASH imaging. A preliminary report 262
Time-resolved transillumination of the breast 277
Ultrasound guided nephrostomy utilizing a one-step balloon catheter. Introduction of a new technique 279
Single exposure dual-energy subtraction radiography of the upper airways using computed radiography 281
Mone Carlo simulation of multiple scattering in Compton spectroscopy 384
Comparison of dual energy X-ray absorptiometry of the proximal femur with morphologic data 477
Comparison of 12-bit and 8-bit gray scale resolution in MR imaging of the CNS. An ROC analysis . . . 505
Visual interpretation compared with caliper and computerized measurements in experimental vessel stenosis 542
MR imaging with STIR technique and air insufflation for local staging of bladder neoplasms 577
